Citronella Version

Citronella is a grass that mainly grows in some Asian countries and some islands of the South Pacific. It has a crisp, rich citrus or lemon-like aroma associated with inducing happy feelings while driving away odors. Although Health Canada prohibits it being marketed as a bug deterrent, it is still a widely accepted as a means of repelling of insects.

Gel Fuel Comes in 24 pack
PDQ merchandiser

Burns 100% Clean. No
Smoke No Soot.

Smartflame

New Paramount Fuel

Paramount *Smartflame* is made from a patented formula that uses a special wick to burn. If the fuel spills out of the can the spilled material will not continue to burn, giving the consumer peace of mind.

Smartflame offers a thick quality flame just like regular ethanol gel fuel. One can lasts up to 3 hours, and produces approx. 3000 BTUs per can, just like regular gel fuel. There is no odor and it is easily extinguished by placing the lid or a snuffer over the opening.

This box is UPSable

BTU's -3000 PER CANISTER

FEATURES

- Smokeless Paramount Fuel for Indoor/Outdoor Use.
- Uses a wick so spilled fuel will not burn
- Burning time approx 2 to 3 hours per can
- Heating Output – up to 3,000 BTUs per can
- Made from new exclusive patented formula
- Bilingual SDS available
- Moves through regular logistics channels and distribution centers
- Fits all Paramount garden burners
- 369 gr single use can

Assurances Regarding Paramount Gel Fuel Safety

Re: Customer Reassurance Around the Safety of Paramount Brand Fuels

On October 9, 2019 Health Canada issued a warning* about pourable Gel Fuel and the potential danger it imposes. J&R Home Products would like to assure all our customers that all Paramount brand gel fuel and Paramount brand Smartflame fuels are exempt from this notice and are not the pourable fuels covered in the warning and are considered safe to use. As well, any Paramount brand garden burner has been designed for use with Paramount brand fuels and is therefore exempt from this warning. In fact the warning recommends that “Non refillable fuel canisters are a safer alternative to pourable fuels.”

The warning applies to alcohol-based fuels that are liquid and pourable. These types of fuels can create a flash back effect that has resulted in injuries.

Paramount Gel Fuel and Paramount Gel Fuel Citronella supplied by JR Home Products is a safe alternative to this liquid pourable fuel. Paramount Gel Fuel is made from a thick gel of ethanol alcohol and has a very thick viscous consistency. It comes in a single use can which is used to hold the gel while it burns, no pouring or excess handling is required. Consumers simply open the lid and light the fuel and discard when depleted. Paramount Gel Fuel’s lower flash point, and thicker, non pourable consistency allows for a safe and enjoyable experience. Paramount’s Gel Firepots & Firepits allow for our gel fuel can to be dropped in and used right away, adding safety and peace of mind.

Paramount *Smartflame* is also supplied in a single use can and is made from a patented formula that uses a special wick to burn. If the fuel spills out of the can the spilled material will not continue to burn, giving the consumer peace of mind. *Smartflame* offers a thick quality flame just like regular ethanol gel fuel. One can lasts 2.5 to 3 hours, and produces approx. 3000 BTUs per can, just like regular gel fuel. There is no odor and it is easily extinguished by placing the lid or a snuffer over the opening.

HEALTH CANADA

Health Canada warns Canadians of health and safety risks of certain containers of pourable alcohol-based fuels and certain firepots that use pourable fuels

Starting date: October 9, 2019

Report a Concern

Issue

Health Canada is advising consumers of the serious fire and burn risks associated with flame jetting occurrences that may result from the use of certain containers of pourable alcohol-based fuels and certain firepots that use pourable fuels. These products should not be used in the absence of important safety instructions.

Firepots (also referred to as firebunnies, portable fireplaces, firebowl, patio burners, firepots, firepits or table top fire pits) are portable, decorative lighting accents that support open flame burning. Firepots may be marketed for indoor and/or outdoor use. They are generally made of a ceramic or other heat-resistant material, have an open fuel reservoir that holds the alcohol-based fuel, and may also include a snuff tool to extinguish the flame.

Based on incident reports received by Health Canada, flame jetting may occur when refuelling a firepot, which can result in burn injuries ranging from minor to fatal. A flame jetting incident occurs very quickly when fuel is poured into a firepot that is still burning or hot. The flame or hot liquid ignites the fuel vapours around the pouring fuel stream and the flame then travels up the fuel stream and into the fuel container. This can result in a burst of flaming fuel being violently expelled out of the container onto the user and nearby people or objects.

A flame jetting occurrence is unexpected and occurs in a fraction of a second, making it impossible for the user and/or bystanders to react quickly enough to move away from a flame jet. Flame jetting incidents often involve multiple victims and, in Canada, have resulted in fatalities and very serious injuries.

What you should do

Never pour fuel over a flame. Some fuels will burn in a way that flames may be difficult to see, especially when a low amount of fuel is left in the firepot. Be certain the firepot has cooled completely before refuelling.

Do not use pourable fuel containers without a flame arrester. A flame arrester prevents a stream that is built into the container opening. It allows liquid to flow out and reduces the chance that a flame can travel into the container and cause a flame jetting occurrence.

Non-refillable fuel canisters are a safer alternative to pourable fuels.

Other safety considerations for firepots and pourable fuels:

- Use firepots on level ground or on a stable, level surface, at a safe distance from people and flammable items.
- Keep pourable fuels tightly capped when not refuelling and away from any flames or other objects that can create a spark.

FEATURES

- High quality clear tempered glass safety screen is durable and can withstand high heat while allowing you to enjoy the beautiful flame
- Polished aluminum fire-resistant brackets
- Blocks wind and keeps burn area secure
- For use with propane or natural gas fire tables

Patio Heater Vinyl Covers

Patio Heater Head

Item: PH-COVER-200

Size: 37"L x 9.45"W x 25.6"H
Bag: 13" x 12" x 4"
Master pack 10: 12" x 11.5" x 16"
GW (LBS): 18

- Head size heater cover
- Fits any LPG heater with up to 35" reflector hood.
- Zippered with zipper support rod and Velcro around support pole

Square Firepit Cover

Item: PH-COVER-201

Size: 38"L x 38"W x 28"H
Bag: 16" x 14" x 4"
Master pack of 10:
15.5" x 13.5" x 15"
GW (LBS) 21

- Square firepit cover (for use with domed spark screens)
- Fabric ties for secure fit

Full Patio Heater

Item: PH-COVER-203

Size: 38"D X94"H
Bag: 18" x 14" x 4"
Master pack of 10:
16.75" x 14.75" x 23.75"
GW (LBS): 43.2

- FULL LENGTH heater cover
- Fits any outdoor LPG patio heater up to 35" reflector hood and a table up to 23" D
- Zippered with full length support rod.

Square Patio Heater Cover

Item: PH-COVER-206

Size: 37"L x 20"W x 89"H
Bag: 17"L x 15"W x 4"H
Master Pack of 10:
15.5" x 13.5" x 16.75"
GW (LBS):48

- Full length patio heater cover for square reflector heaters from 10 gauge felt vinyl
- Felt lining, fabric ties

Full size Flame Heater

Item:PH-COVER-205

Dims :19"L x 22"W x 88"H
Bag: 18" x 14" x 4"
Master Pack of 10:
17" x 14" x 22.5"
GW (LBS): 36

- Square full length flame heater cover
- Zippered with support rod

Round Firepit Cover

Item: PH-COVER-202

Size: 42"D X 24"H
Bag: 16" x 14" x 4"
Master Pack of 10:
15.5" x 13.5" x 16.75"
GW(LBS) 20

- Round firepit cover (for use with domed spark screens)
- Fabric ties for secure fit

Spiral Flame Heater Cover

Item: PH-COVER-207

Size: 20.8" x 20.8" x 65.7"
Bag: 16" x 14" x 4"
Master Pack of 10:
15.5" x 13.5" x 16.75"
GW(LBS) 20

- Spiral Flame heater cover
- Fabric ties for secure fit

Pagoda Cover

Item: PH-COVER-204

Size: 32"X 32" X 43"
Bag: 16" x 14" x 4"
Master Pack of 10:
15.5" x 13.5" x 13.5"
GW(LBS) 19

- Easily slips over your pagoda or firepit
- Fabric ties for secure fit
